

Project Notification Update in Washington, PA

As part of our commitment to provide safe and reliable natural gas service to our customers, Columbia Gas of Pennsylvania will be making a significant investment to replace natural gas pipelines in your neighborhood in 2023.

During this time, you may see our contractors or employees doing work and inspections on your street, public rights-of-ways and customers' properties and meters. This project may include replacing your service line and moving any indoor gas meters outside at no additional cost to you. However, this stage of the project will not occur until after the upgraded pipeline has been installed. Work is expected through the rest of 2023 from 7 AM to 7 PM, Monday through Friday with Saturday work possible. Motorists can expect road closures and lane restrictions during working hours only.

Please use extreme caution when traveling through our work zone. Please slow down and obey flaggers and all posted signs including detours and parking restrictions. We apologize for any inconvenience and will make every effort to limit traffic restrictions.

We appreciate your patience and cooperation on this important project to maintain safe and reliable natural gas service to homes and businesses in the community. Please contact Carla Parkes at cparkes@nisource.com for any questions or concerns.
